International Conference on Structures and Building Materials (Lijuan Li)

Advances in structures: selected, peer-reviewed papers from the 2011 International Conference on Structures and Building Materials, (ICSBM 2011), 7-9 January, 2011, Guangzhou, China. This collection of 501 peer-reviewed papers covers a wide range of topics related to the design and performance of structures and building materials, highlighting recent advances and innovations in the field.

The conference, held in Guangzhou, China, brought together experts and practitioners from around the world to discuss the latest developments in the field of structures and building materials. The selected papers cover topics such as materials science, structural engineering, and construction methods, offering valuable insights into the current state of the industry and future trends.

The conference proceedings are published in the Advanced Materials Research series by Trans Tech Publications, providing a valuable resource for researchers, engineers, and professionals in the field of structures and building materials.

For more information or to access the full proceedings, visit the publisher’s website or contact the conference organizers directly.
