Anaesthesia, Intensive Care, and Pain Management for the Cancer Patient

Paul Farquhar-Smith; Tim Wigmore

Intensive Care, and Pain Management. Patients admitted for operations will see their anaesthetist before the operation and any The RSCH is a major cancer specialist unit, and many of the ICU admissions come after major Cancer Pain Management. Many patients in intensive care need advanced treatment for severe pain. In critical care medicine, anesthesia can provide an optimal level of pain management, in many specialties including cancer, cardiovascular and pain management.
