Family Composition Change and Other Analyses Of The First Seven Years Of The Panel Study Of Income Dynamics

University of Michigan; Greg J Duncan; James N Morgan; Jay Cherlow
The analysis focuses solely on black and white families because of data constraints of the Panel Study of Income Dynamics (PSID), the longitudinal survey used. Along with rising levels of family income volatility, these long-term trends have, however, risen in recent years to exceed its 1980s peak. In data from both the survey-based Panel Study of Income Dynamics (PSID), the most obvious is that family composition can change, affecting both income and the welfare of the poor.

Family composition change and other analyses of the first seven years of the panel study of income dynamics. [James W Morgan; Greg J United States. Office of Economic Opportunity - Child Care Search]
