Poverty and the Social Dimensions of Structural Adjustment in Côte D'Ivoire

S. M. Ravi Kanbur; World Bank

Poverty and the Social Dimensions of Structural Adjustment in Côte d'Ivoire has been selected as a case study for the first application of poverty and the social dimensions of structural adjustment: a methodology and proposed application to Côte d'Ivoire. The study asserts that SAPs would not put countries on a sustained, poverty-reducing growth path. It highlights that poverty and the social dimensions of structural adjustment are critical areas for policy analysis and proposed application in Côte d'Ivoire.
